ODR-01-23

Q. What is the cost difference between the Mosher option and the Elm Street option?

A. Please refer to Volume V, Exhibit H-3, page 2 of 2 for a summary of the comparative cost estimate prepared for each alternative considered.

The estimated cost of the S1 Elm alternative is \$352,897,659.

The estimated cost of the S1 Mosher's alternative is \$368,877,446.

The difference in estimated cost is \$15,979,787.
