

**CENTRAL MAINE POWER COMPANY
SUPPLEMENTAL RESPONSE TO ORAL DATA REQUEST NO. 3
DOCKET No. 2008-255**

January 22, 2009

ODR-03-56 Supplemental

- Q.** Please provide a visual simulation from the Dumais property (228 Dyer Road, Lewiston) (see section 64 of segment 17, page 52) of the existing ROW, the proposed line, and a single pole 115 and H-frame 345 (which would keep the tree buffer).
- A.** Attached is a visual simulation from the Dumais property in Lewiston.

Response Prepared and Submitted By:
David Dominic

MAINE POWER
RELIABILITY PROGRAM
A CENTRAL MAINE POWER COMPANY PROGRAM

Dumais Property

Sources: Maine Office of Geographic Information (OGIS), Maine Inland Fisheries and Wildlife (IF&W), Maine Natural Areas Program (MNAIP), United States Geological Survey (USGS), Central Maine Power Company (CMP), Power Engineers Incorporated (PEI), TRC (TRC)

Existing panoramic view looking west to north from the Dumais Residence driveway off Dyer Road in Lewiston, ME. Location of photograph selected by E. Dumais.

Photosimulated view of proposed Segment 17, which includes two existing 115 kV transmission lines and one new 345 kV transmission line. The proposed 345 kV transmission structures would not be visible from this viewpoint, but the conductors would be visible. This simulation assumes 41' +/- of vegetation would be preserved within the CMP transmission corridor adjacent to the Dumais property.

Photosimulated view of the Dumais' proposed alternative that maintains 112' +/- of vegetation within the CMP transmission corridor. (See cross section included.)
